Mr. Bill Pfister
CALIFORNIA REGIONAL WATER QUALITY
CONTROL BOARD
3374 East Shields Ave., Room 18
Fresno, CA 93726

Dear Mr. Pfister:

Attached is an application from Petro-Lewis Corporation to conduct a water disposal project in the Santa Margarita zone in the Premier area, Poso Creek field.

The operator proposes to drill well "Newhouse" 1-D to injection. Additional details are:

1. Overlying geology - interbedded silts & silty-sand
2. Analysis of zone fluid - 1970 TDS
3. Analysis of injection fluid - 25,800
4. A review of wells within the project area indicates possible migration into a shallower zone. A more detailed analysis of the affected wells currently is being undertaken.
5. See attached map for proposed well location and area of review.

Additional supportive data, which are interpretive and therefore confidential, are available for your inspection at this office.

The proposed injection zone has been exempted by the EPA.

Please submit to this office any comments you may have on this proposed project. Your comments are due within 14 calendar days from the date of this letter.

Yours truly,

David Clark
Associate Oil & Gas Engineer
